(2024-2025)**

Q1. A leading firm in the 'Fast-moving Consumer Goods' sector, found out through researcher that there is a vast potential in the branded flour (atta) market that could be tapped. On the basis of this, the company decides to enter the market. (a) Discuss the process of designing the positioning and Brand building strategy for the product. (b) What kind of differentiator/innovation the company could have shown in this case?

Ans: To successfully enter and grow in the branded flour (**atta**) market, the **FMCG firm** must carefully **position** the product and build a **strong brand**. This involves strategic thinking in terms of **consumer perception, differentiation, and innovation**.

(a) Process of Designing the Positioning and Brand Building Strategy for Branded Atta:

The positioning and brand building strategy can be developed using the following steps:

1. Market Research & Segmentation

- **Understand Consumer Needs:** Identifying different consumer segments(for e.g. health-conscious, traditional, premium, price-sensitive).
- **Study Competitors:** Analyze leading brands like Aashirvaad, Pillsbury, and Fortune to identify gaps.
- **Identify Purchase Drivers:** Identifying major factors that can drive purchase like taste, purity, health-benefits, price, convenience, sourcing of wheat.

2. Define Target Audience

- Decide whether the brand targets:
 - Urban middle-class families seeking convenience & hygiene
 - Health-conscious consumers preferring multigrain options
 - Rural/price-sensitive consumers seeking value packs

3. Value Proposition & Differentiation

- Formulate a clear **value proposition**:

e.g.: "100% Sharbati wheat from Madhya Pradesh, Stone-ground for superior taste and nutrition."

This value proposition is built around:

- **Quality** (grain source, grinding process)
- **Health benefits** (multigrain, low Glycemic Index)
- **Trust** (purity, no additives)

4. Positioning Statement

- A concise positioning could be:

“A premium atta for families who care about nutrition, taste, and purity – direct from farm to plate.”

5. Brand Identity Creation

- **Name, logo, tagline:** e.g., “Annapurna Gold – Swaad aur Sehat ka Vaada”
- Packaging design to reflect freshness, traditional values, and modern hygiene

6. Marketing & Communication Strategy

- **Advertising:** TV, digital, influencer partnerships (home chefs, nutritionists)
- **Emotional Appeal:** Connect through nostalgia, “like mom’s cooking”, purity of traditional chakki atta.
- **Retail Activation:** In-store demos, free samples

7. Distribution & Pricing

- Ensure widespread availability (local kirana stores, supermarkets, e-commerce platforms)
- Consider **introductory offers** or **bundled packs** to penetrate market

8. Monitor and Refine

- Use feedback to refine positioning or expand into variants (e.g., multigrain, diabetic-friendly, organic atta)

(b) Differentiator/Innovation the Company Could Introduce:

To stand out in a **cluttered branded atta market**, innovation and unique differentiators are critical:

1. Ingredient/Health-Based Innovations

- **Multigrain variants:** Blend with ragi, oats, barley, quinoa
- **Functional atta:** Diabetic-friendly (low GI), high-fiber, fortified with iron or protein
- **Organic atta:** Certified organic wheat from trusted farms

2. Sourcing & Traceability

- **“Farm to Fork” transparency:** QR codes on packs to trace back to farms
- **Single-origin wheat:** Highlighting quality and taste (e.g., 100% MP Sharbati)

3. Grinding & Processing Techniques

- **Stone-ground/Chakki Atta** with minimal processing to retain fiber and nutrients
- Cold grinding for better preservation of nutrients

4. Packaging Innovations

- Resealable, moisture-proof bags
- **Smaller trial packs** for sampling
- **Eco-friendly packaging** to appeal to environmentally conscious consumers

5. Tech-enabled Convenience

- **Subscription models:** via app or website (monthly home delivery)
- Recipe suggestions via QR code scan on pack

6. Social and Emotional Branding

- **Empower farmers:** Share part of profits or co-brand with farmers
- **Women empowerment:** Branding around women-led sourcing or processing centers

Conclusion

To succeed in the **branded atta market**, the company must:

- Position the brand with **clarity and relevance**
- Build **trust and emotional connection**
- Stand out with **tangible innovations** in product, packaging, sourcing, or health benefits.

Q2. A food company wants to develop a new soup to enter the healthy soup market. The new soup will consist of vegetables, proteins and fiber. The company wishes to position it as a Complete Meal. The company has to compete against established soup players in the market. For this the company plans to conduct blind fold taste tests, asking the consumer to compare the new product with a variety of soups alternative currently available in the market. You are the head of the new product committee, and the president of the company wants that the launch be successful. (a) You have been asked to think about the Brand Name, its positioning in the market, and other things about its successful launch. (b) You have been assigned the task of launching new soup in the market. Discuss various Integrating Marketing Mix activities to build Brand Equity. (c) What will be the key differentiation/Innovation strategy for your soup?

Ans: To ensure the **successful launch of a new healthy soup positioned as a complete meal**, your strategy must be holistic—spanning brand creation, market positioning, and integration of the marketing mix. Below is a detailed plan addressing all three aspects:

(a) Brand Name, Positioning & Launch Strategy

Brand Name Suggestions

Choose a name that reflects health, taste, and convenience. It should be:

- **Memorable**
- **Relevant to health & nutrition**
- **Appeal to urban and health-conscious consumers**

Name Ideas:

- **NutriBowl**
- **Soupéa** (play on *souper* + *idea*)
- **MealSip**
- **HeartyPot**
- **WellThyme**

Positioning Statement

“A delicious, wholesome soup packed with real veggies, proteins, and fiber — a healthy, filling meal in a bowl.”

- **Target Audience:** Busy working professionals, health-conscious individuals, students, fitness enthusiasts
- **Category:** Healthy convenience food / Complete meal replacement
- **Positioning Angle:**
 - More than a snack – **it’s a full meal**
 - Balanced nutrition — **vegetables, protein & fiber**
 - **Convenient**, quick to prepare, satisfying
 - Clean-label ingredients (no preservatives, low sodium, etc.)

Launch Strategy Overview

- **Pre-launch:** Buzz via social media, influencer previews, teaser videos ("What if soup could be a meal?")
- **Launch Events:** Blindfold taste tests, mall activations, health & wellness expos
- **Trial Promotion:** Free samples, starter combo packs, BOGO offers
- **Strategic Tie-ups:** With gyms, co-working spaces, and wellness brands

(b) Integrated Marketing Mix Activities to Build Brand Equity

To build strong **Brand Equity**, your marketing mix (4Ps) should reinforce your positioning and connect emotionally and functionally with the consumer.

1. Product

- **Formulation:** Balanced macronutrients (protein, carbs, fiber) to truly qualify as a meal
- **Variants:**
 - High-protein chicken veggie soup
 - Vegan lentil quinoa soup
 - Keto-friendly mushroom spinach soup
- **Packaging:**
 - Single-serve and multi-serve packs
 - Microwaveable, recyclable, resealable
 - Nutritional info clearly displayed
- **USP on pack:** “Complete Meal in a Bowl – No Compromise on Taste or Health”

2. Price

- **Penetration pricing** for early adoption
- **Combo offers** (packs of 3 or 5)
- **Premium but value-driven pricing:** Slightly higher than instant soups, but lower than a full meal

3. Place (Distribution)

- **Modern Trade:** Supermarkets, hypermarkets
- **E-Commerce:** Amazon, Big Basket, company website
- **Quick Commerce:** Blinkit, Zepto, Swiggy Instamart
- **Alternate Channels:**
 - Gyms, yoga studios, co-working cafes
 - Vending machines in corporate parks

4. Promotion

- **Advertising:**
 - Tagline: *"More than Soup. It's a Meal."*
 - Ads focusing on "skipping meals vs having a complete meal in minutes"
- **Influencer Marketing:**
 - Fitness influencers, nutritionists, mommy bloggers
- **In-store Promotions:**
 - Free tastings, bundled offers, discounts on first-time purchases
- **Digital Campaigns:**
 - Recipe ideas, nutrition challenges, user reviews
- **CSR Angle:**
 - For every X packs sold, donate one to a food relief program
 - Position brand as socially conscious

(c) Key Differentiation / Innovation Strategy

In a **crowded soup market**, true innovation must go beyond flavor. Here are **differentiators** that will position your soup as the superior and modern choice:

1. Functional Nutrition

- **Macronutrient balanced:** Target 300–400 kcal per serving, 15–20g protein
- **Variants for dietary needs:**
 - **Vegan**
 - **Keto**
 - **High-fiber**
 - **Immunity Boosting (with turmeric, ginger, etc.)**

2. Ingredient Transparency & Clean Label

- No preservatives, no MSG, low sodium

- **QR code** to trace ingredients, farming sources, and health facts
- Gluten-free and allergen-free options

3. Convenience Meets Quality

- **Heat-and-eat in under 3 minutes**
- Shelf-stable but feels fresh
- Innovative packaging:
 - **Collapsible soup bowl packs**
 - **Self-heating packs** (premium line)

4. Sustainability

- **Eco-friendly packaging**
- Compostable containers
- Carbon footprint labeling (a growing trend)

5. Taste as a Differentiator

- Run **blindfold taste tests** comparing with competitors
- Highlight **superior taste** and **texture**
- Fusion flavors: *Thai coconut quinoa, Mexican bean chili, Indian masala oats soup*

Conclusion

To make this soup a success in the healthy meal market:

- Position it clearly as a **complete meal**, not just a snack
- Offer **health + taste + convenience**
- Execute integrated marketing activities to build **brand love and loyalty**
- Differentiate through **functional nutrition, clean-label ingredients, and innovative formats**

Q3. A Skinkraft brand is planning to launch new products for hair care and skin care. (a)What are the key steps involved in the new product development process? (b)What are the major challenges faced by companies during the new product development process? (c)How does effective market research contribute to successful new product development? (d)How can companies identify and analyze the market potential for a new product during the success seeking stage? (e)What role does feedback and continuous improvement play during the success seeking stage?

Ans: Launching new hair care and skin care products—like in the case of **Skinkraft**—requires a well-structured **New Product Development (NPD)** process. The beauty and personal care industry is highly competitive and consumer-driven, so success depends on research, innovation, adaptability, and customer connection.

(a) Key Steps in the New Product Development Process

1. Idea Generation

- Internal R&D, customer feedback, market trends
- Explore gaps in hair and skin care (e.g., scalp health, sensitive skin)

2. Idea Screening

- Evaluate feasibility, market potential, alignment with brand
- Eliminate ideas with low ROI or brand misfit

3. Concept Development & Testing

- Develop product concepts (e.g., *"personalized anti-dandruff shampoo for oily scalp"*)
- Test with focus groups or online surveys for consumer reactions

4. Business Analysis

- Estimate costs, pricing, profitability, market demand
- Perform **SWOT analysis**

5. Product Development

- Create prototypes or test formulations
- Conduct stability tests, dermatological trials, packaging design

6. Test Marketing

- Launch in select markets or to a limited group (e.g., via online D2C)
- Assess product performance, user satisfaction, purchase intent

7. Commercialization

- Full-scale production and launch
- Develop go-to-market strategy (distribution, pricing, advertising)

8. Post-launch Review

- Collect feedback, monitor sales and satisfaction
- Adjust product or strategy as needed

(b) Major Challenges in New Product Development

1. Rapidly Changing Consumer Preferences

- Trends shift fast in skincare (e.g., clean beauty, fragrance-free, actives)

2. High R&D and Testing Costs

- Especially for dermatologically tested, customized, or organic products

3. Regulatory Compliance

- FDA/AYUSH or cosmetic regulations for ingredients and claims

4. Differentiation in a Crowded Market

- Standing out among established brands and local players

5. Supply Chain & Ingredient Sourcing

- Ensuring high-quality, sustainable, and traceable raw materials

6. Risk of Product Failure

- Consumer rejection despite testing due to real-world dissatisfaction

7. Time-to-Market Delays

- Delays in testing, approval, or production can miss peak demand cycles

(c) Role of Effective Market Research in NPD

1. Identifying Consumer Needs

- Understand skin/hair types, unmet needs, preferences (e.g., sulfate-free, fragrance-free)

2. Tracking Trends

- E.g., rise in demand for niacinamide, peptide-based serums, or Ayurvedic hair care

3. Understanding Competitor Strategies

- Pricing, formulations, branding, marketing channels

4. Testing Concepts

- Use focus groups or online surveys to validate product ideas

5. Defining Target Audience

- Segment based on age, gender, skin/hair concerns, income, lifestyle

6. Packaging & Pricing Research

- Preferences for eco-friendly packs, pump dispensers, sachets, etc.

(d) Identifying & Analyzing Market Potential During the Success-Seeking Stage

1. Market Size Estimation

- Use industry reports, secondary data, and purchase intent studies

2. Segmentation Analysis

- Understand which demographic or psychographic segments show high demand

3. Consumer Trials

- Early testers provide usage insights and repurchase behavior

4. Competitive Landscape

- Benchmark against similar products: pricing, distribution, claims

5. Distribution Feasibility

- Evaluate offline and online channel readiness (D2C, e-commerce, salons)

6. Demand Forecasting

- Use tools like conjoint analysis or A/B testing to predict likely success

7. Scalability Assessment

- Can production, marketing, and logistics scale as per demand?

(e) Role of Feedback & Continuous Improvement During the Success-Seeking Stage

1. Real-Time Consumer Feedback

- Collect reviews, complaints, suggestions post-launch

2. Product Iteration

- Improve formulation based on user experience (e.g., texture, results, scent)

3. Marketing Adjustments

- Refine messaging, channels, or creatives based on what resonates

4. Customer Service Insights

- Address issues like allergic reactions, delivery problems, or confusion about usage

5. Usage Data Analytics

- Track repeat purchases, subscription rates, abandoned carts

6. Innovation Pipeline

- Use feedback to build related or improved products (e.g., variants for other hair types)

7. Brand Trust Building

- Responsiveness to feedback fosters loyalty and long-term brand equity

Summary:

Aspect	Key Points
NPD Steps	Idea → Screening → Concept → Business Analysis → Development → Test Marketing → Launch → Review
Challenges	Cost, competition, changing trends, regulations, differentiation
Market Research Role	Identifies needs, trends, competitors, validates ideas
Market Potential	Size, segments, trials, demand forecasting, scalability
Feedback Role	Drives iteration, trust, product improvement, and sustained success

Q4. (a) For an ed-tech company, how porters 5 forces help in decision making? (c)With respect to Ed-tech industry, how does the political environment and economic factors impact the product's market entry and growth potential? (c)What is product cannibalization? (d) why is it essential to assess its potential impact on a company's product portfolio? (e)How can companies identify and analyze instances of product cannibalization within their product lines?

Ans: Great questions — these are all critical strategic considerations for any **Ed-Tech company**, especially when launching or managing a portfolio of products in a competitive and evolving industry.

(a) How Porter's 5 Forces Help an Ed-Tech Company in Decision Making

Porter's Five Forces is a strategic tool that helps understand the competitive landscape and profitability potential in an industry. Here's how it applies to Ed-Tech:

1. Threat of New Entrants

- **Relevance:** Low barriers to entry in Ed-Tech due to digital platforms and growing demand.
- **Impact:** Forces the company to innovate, build brand loyalty, and invest in customer retention.

2. Bargaining Power of Buyers

- **Relevance:** High — learners (and parents) have many alternatives, often price-sensitive.
- **Impact:** Drives decisions on pricing models (freemium, subscription), feature differentiation, and customer support.

3. Bargaining Power of Suppliers

- **Relevance:** Moderate — includes content creators, educators, tech partners.
- **Impact:** Decisions around in-house vs outsourced content, and partnership terms.

4. Threat of Substitutes

- **Relevance:** High — substitutes include free YouTube content, traditional education, coaching classes.
- **Impact:** Pushes Ed-Tech firms to offer value beyond content: personalization, gamification, certifications.

5. Industry Rivalry

- **Relevance:** Very high — highly competitive with players like Byju's, Unacademy, Coursera, etc.
- **Impact:** Affects pricing strategy, innovation speed, marketing spend, and acquisition decisions.

Decision-Making Areas Influenced:

- Market entry timing
- Differentiation strategy
- Content investment
- Pricing and subscription models
- Go-to-market strategies

(b) Political and Economic Factors Impacting Ed-Tech Market Entry & Growth

1. Political Environment

- **Government Policies on Education:** NEP 2020 in India supports online learning — favorable for Ed-Tech.
- **Regulatory Compliance:** Data protection laws, child safety online, education licensing.
- **Public-Private Partnerships:** Policies promoting digital classrooms, skilling programs open B2B opportunities.

2. Economic Factors

- **Disposable Income:** In developing economies, affordability can restrict growth for paid models.
- **Internet & Device Penetration:** Economic disparity affects access to smartphones, stable internet.
- **Inflation/Cost Structures:** Impact marketing budgets, educator payouts, and tech infrastructure.
- **Employment Trends:** Rising unemployment or reskilling needs fuel demand for upskilling platforms.

Implications:

- Adjust pricing to suit local affordability
- Localize content to meet policy needs
- Leverage economic schemes for expansion (e.g., government-sponsored skilling)

(c) What is Product Cannibalization?

Product Cannibalization is when a new product introduced by a company **eats into the sales of its existing product**, rather than attracting a new customer base.

Example in Ed-Tech:

If a company launches a cheaper, basic course in the same subject where a premium course already exists, customers may shift to the cheaper one, **reducing overall revenue**.

(d) Why Assessing Cannibalization Is Essential for a Company's Product Portfolio

1. Profitability Impact

- A new product may bring volume but reduce **total margin or revenue**.

2. Brand Positioning

- A low-priced or diluted offering might damage the brand's **premium perception**.

3. Resource Allocation

- Time, budget, and talent diverted to a cannibalizing product may reduce **overall ROI**.

4. Strategic Planning

- Helps **optimize product mix**, avoid internal competition, and segment offerings better.

(e) How Companies Can Identify and Analyze Product Cannibalization

1. Sales Data Analysis

- Monitor sales trends of older products post new product launch.
- **Red flags:** Drop in older product sales without overall user growth.

2. Customer Segmentation

- Survey or analyze user migration — Are *existing customers* switching, or are you reaching *new segments*?

3. Profitability Tracking

- Compare margins: is the new product more or less profitable per user?
- Use **contribution margin analysis**.

4. Alpha/Beta Testing

- Launch new product to a test group; measure impact on other products before full-scale rollout.

5. Cohort Analysis

- Track user behavior over time — Are loyal users shifting or downgrading?

6. Pricing Experiments

- Evaluate if positioning and pricing are attracting new users or cannibalizing existing ones.

Summary Table:

Question	Key Takeaways
(a) Porter's 5 Forces	Helps in competitive strategy, pricing, product planning
(b) Political & Economic Factors	Influence accessibility, affordability, regulation, and demand
(c) Product Cannibalization	New product reduces sales of existing offerings
(d) Why It Matters	Impacts revenue, brand value, and resource allocation
(e) How to Identify It	Sales trend analysis, customer migration, A/B testing, profitability tracking
